

RAG (Retrieval-Augmented Generation) Results

Question: java abstract classes

Search Method: Cosine

Embedding Model: text-embedding-3-small

Generation Model: gpt-4o-mini

Generated: 2025-07-24 15:27:49

Generated Answer

Sorry, I couldn't generate an answer due to an error.

RAG Process Summary

This RAG (Retrieval-Augmented Generation) search performed the following steps:

1. **Retrieval:** Found 5 most relevant document chunks using cosine similarity with text-embedding-3-small model
2. **Augmentation:** Combined the retrieved content as context
3. **Generation:** Used gpt-4o-mini model to generate a comprehensive answer based on the context

RAG provides more accurate and contextual answers by grounding the AI response in your specific document content. Using separate models for embedding and generation allows for optimized performance in each task.
